

Partners in Recovery

Discussion with the Team Nurse

1. Ask the nurse to discuss his or her understanding of how well the individual is doing with the current service plan in relation to management of the psychiatric diagnosis and recovery goals.

2. Ask the nurse to discuss his or her understanding of any medical issues that are occurring with the individual, and what coordination of care has occurred with the Primary Care Physician, and medical specialists.

3. Ask the nurse what, if any barriers are there, to receiving PCP care.

4. Ask the nurse what nursing interventions and nursing education have been provided to increase an individual's understanding of their diagnosis, symptom management and medication adherence?

5. Review if the annual health assessment and vital signs were completed.
